DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,730,012 to Juy (Juy '012).

Juy '012 discloses in figure 2, a derailleur comprising a fixed member 1 having a first mounting flange (not numbered) and a second mounting flange (not numbered) wherein said first and second mounting flanges have different axial widths; a first link 4 located within an attachment portion 1b of said fixed member; a second link 3; a third link 2; wherein said second link is coupled via a pivot 18 to said first and second mounting flanges; and a biasing member 12.

As broadly claimed the limitation of "said first mounting flange extending in a rearward axial direction along said second pivot axis relative to said center axis of said curved mounting surface and said second mounting flange extending in a forward axial direction along said second pivot axis relative to said center axis of said curved mounting surface" does not limit the relative location of said first mounting flange and said second mounting flange relative to a longitudinal axis of said curved mounting surface but merely limits that each respective flange to broadly extends in a rearward or a forward direction.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 2-8 and 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 3,730,012 to Juy (Juy '012).

Juy '012 discloses the basic apparatus as previously cited but does not disclose the specific dimensional relationships of the elements. However, the actual dimension is merely a matter of engineering design choice and the level of skill of one of ordinary skill in the art would produce a similar optimization, especially absent any evidence to the contrary, i.e. unexpected results.

Furthermore, it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233 (CCPA 1955).

Allowable Subject Matter

5. Claims 9 and 10 are allowed.

The prior art discloses or teaches the basic apparatus as previously cited but does not disclose said first pivot axis being spaced farther from a center plane of the chain receiving slot of the chain guide than said second pivot axis.

Response to Arguments

6. Applicant's arguments filed 13 July 2003 have been fully considered but they are not persuasive. It is well established that unexpected results must be established with factual evidence. Absent test data comparing the applicants invention to the closest prior art, such arguments are mere assertions of unexpected results. See *In re Lindner*, 457 F.2d 506, 508, 173 USPQ 356, 358 (CCPA 1972); *Ex parte George*, 21 USPQ2d 1058 (Bd. Pat. App. & Inter. 1991). The arguments of applicant's representative cannot take the place of evidence in the record. *In re Schulze*, 346 F.2d 600, 602, 145 USPQ 716, 718 (CCPA 1965). See also MPEP § 716.01(c). Furthermore, the apparatus of Juy '012 would not be destroyed merely by adjusting dimensions of certain elements to optimum or workable ranges. The modifications to Juy '012 necessary to achieve the claimed limitations would have been obvious to one of ordinary skill in the art.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
